

Tree Removal & Back Filling Acknowledgement

Property Location: _____

Damages to Septic System if Trees Remain

Damages may occur to the septic bed due to the trees that have been left standing around the surroundings of the leaching area within 5m.

Damages to Trees when Back Filling

Back filling can cause compaction of the root system which leaves the tree susceptible to; (a) decreased intake of water/minerals from the soil, (b) diseases and bug infestation, which in turn can lead to the tree's death.

- We acknowledge our full responsibility, as landowner(s), for any damages incurred as specified above.**
