

Notice of request for an order to declare that the Environmental Assessment Act (EAA) does not apply to the planning and construction the Port of Prescott Expansion, Rehabilitation and Future Development Area

The Port of Prescott, located east of the Town of Prescott in Edwardsburgh/Cardinal Township, is the only large marine terminal between Montreal and Toronto. Shipping is the cheapest mode of transportation, and detailed business plans show the potential for increased shipping using the Port.

The proposed expansion has three stages. First is construction of a new wharf and terminal. Stage two will repair an existing wharf, and stage three is a land-based expansion for future bulk storage.

Environmental studies, completed by the Port of Prescott, the Mohawk Council of Akwesasne, and South Nation Conservation show the expansion will not harm the environment.

For more information, including closing date for comments, visit the Ministry of the Environment's Environmental Registry: www.ebr.gov.on.ca/ERS-WEB-External/, registry # 011-0078. Copies of the study are available at the Township of Edwardsburgh-Cardinal, 18 Centre Street, Spencerville and the Port of Prescott, 3035 County Rd. #2, Prescott. An open house will be held at the South Edwardsburgh Community Centre, 44 Sutton Dr., Johnstown on July 7th, from 5-9 pm.

Under the *Freedom of Information and Protection of Privacy Act*, comments on this project will be part of the public record. For Project-related questions, please contact:
