## **Original Soils Proposal**

## **REQUIREMENTS**

- (1) In any situation where the agent/designer feels that the original material could be utilized for part of the entire installation of the leaching bed, a sample(s) must be collected by the agent/designer and submitted to a certified laboratory to be analyzed OR the licensed laboratory collects the sample on-site to be then analyzed.
- (2) In any circumstances were more than 25 cm of original material is to be utilized for the installation of the leaching bed, the sample must be taken at the depth of unsaturated native material being used.

-----

(3) Ensure the following information is filled out and submitted prior to submitting a sewage system permit application or requesting an inspection to prevent any delays.
