SNC is to be named as an “Additional Insured Party” on the certificate. The Contractor shall submit proof of such insurance in the form of a certificate which shall contain a firm undertaking by the insurer to give SNC 30 days’ notice prior to any cancellation or modification of such insurance. The contract shall commence upon signing and shall be completed by March 31, 2023. The term may be extended in accordance with mutually agreed terms between the Purchaser and SNC. A fee of \$1,000 will apply to contract extension, unless SNC deems that there were factors that prevented completion within the designated timeframe (e.g. unfavorable weather conditions).
3. The tender for Forest Resources and Conditions of Sale will form part of the Stumpage Sale contract.
4. The successful bidder will immediately deposit with SNC upon signing of Stumpage Sale contract, a certified cheque in the amount equivalent to 10% of the total bid price to be held for the duration of this Agreement.

The regulation limit is derived from the greatest of the applicable limit of hazardous lands, river and stream valley lands, wetlands or other areas. Each limit is determined independently (i.e. stream bank erosion and flood plain limits) to clearly determine the greater limit at each location. The regulation limit includes a 15 metre allowance and is a compilation of various information sources including existing floodplain mapping previously prepared for SNC by engineering consultants. Regulation of alteration to watercourses applies to all watercourses. Any watercourse which does not currently have a floodplain study associated with it generally has a 15 m regulated area from top of bank, however, the area may be lesser or greater based on site specifics.
